DETAILED ACTION

Election/Restrictions

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 1-9, drawn to a method of monitoring physiological signals, classified in class 600, subclass 300.
- II. Claims 10-22, drawn to a method of evaluating and testing the heart, classified in class 600, subclass 508.
- III. Claims 23-27, drawn to an apparatus for monitoring physiological signals, classified in class 600, subclass 300.

The inventions are distinct, each from the other because of the following reasons:

Inventions I and II (process) and III are related as process and apparatus for its practice.

The inventions are distinct if it can be shown that either: (1) the process as claimed can be practiced by another materially different apparatus or by hand, or (2) the apparatus as claimed can be used to practice another and materially different process. (MPEP § 806.05(e)). In this case the apparatus as claimed can be used to practice another and materially different process not involving the heart (group II) but monitoring the lungs or stomach. In addition, the process as claimed (group I) can be used to practice another materially different apparatus not involving using training data but using data sensed previous from the patient or using set thresholds.

Inventions I and II are different methods and are therefore independent and distinct.

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art because of their recognized divergent subject matter, restriction for examination purposes as indicated is proper.

Art Unit: 3762

A telephone call was made to Peter Borghetti on 8/19/02 to request an oral election to the above restriction requirement, but did not result in an election being made.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

Any inquiry concerning this communication or earlier communications from the examiner should be directed to George R Evanisko whose telephone number is 703 308-2612. The examiner can normally be reached on M-F 6:30-5:00.
